EXPERIENCE

Testronix Network Solutions Inc. **July 2025 - Present**

Technical Support Engineer

- Deploy and configure solutions such as NetGain Systems and Tenable for network monitoring and cybersecurity in customer IT environments.
- Support deployed solutions and troubleshoot installation, configuration, and connectivity issues.
- Monitor availability and infrastructure performance using NetGain Systems, NinjaOne, and LiveAction.
- Support vulnerability assessments and risk identification with Tenable to help customers strengthen their security posture.
- Assist with incident response and analyze network issues, anomalies, and performance to support reliable IT operations.

Kyouritsu Electronics Philippines, Inc. **February 2023 - June 2025**

IT Staff / IT Technician Support

- Managed IT infrastructure and supported hardware and software operations in the MIS/IT Department.
- Troubleshot hardware and software issues, maintained networks and printers, and administered CCTV systems.
- Handled system installations and upgrades and maintained file and backup servers.
- Supported end-users with Microsoft Office, operating systems, and daily technical issues.

Acbel Polytech Philippines, Inc. **August 2022 - October 2022**

Automation Engineer Intern

- Assisted with automation equipment maintenance, troubleshooting, and data collection.
- Supported basic Human-Machine Interface (HMI) optimization and system startup.

EDUCATION

TRACE College **2019 - 2023**

Bachelor of Science in Computer Engineering | Los Baños, Laguna
